

Dear Mr. Pinion:

This letter is a follow up to our telephone conversation on Friday and our meeting last Wednesday concerning the bronze sculpture of Jesse Owens.

My price on the LIFE-SIZE statue of Jesse Owens, finished and ready for installation and delivery to the site in Moulton is \$33,000.00.

The price on the 8 ft. figure is \$68,000.00 rather than \$72,000.00 as I stated on the telephone. I have received later estimates on the engineering and reinforcement expenses.

The price on the 10 ft. figure is still at \$98,000.00 and the delivery times are 7 months on the 6 ft. figure, 10 months on the 8 ft. figure and 12 months on the 10 ft. figure.

I would require 1/3 down, 1/3 phase payment to cover to cover casting and mold work and 1/3 upon delivery and installation.

As mentioned earlier, the above prices do not include installation expense but do include a limited warranty on the cantilevered leg and weight factor (for one year) if the sculpture is protected by some security system (from vandalism).

I will assist you with installation to insure proper fit-up and lock down to the mount and will work closely with your designer architect to insure the best possible visual results and I will give you continued assistance and consultation on the care and cleaning of the finished bronze.

You and your committee would of course, be welcome to view the work in progress in various stages of development.

The larger scale work 8' to 10' pieces, will probably be sent to a New York foundry for casting. They are excellent in every area and reliable to schedule.

Finally, the base sizes (bronze) will be 3'X 4'X 3" or slightly smaller. The 8' will carry a bronze base of 42"X 72" X3" high and the 10' high bronze will be 4'X 8'X 3" to 4" high, base plate.
